SUPERVISORY PATENT EXAMINER

DETAILED ACTION

Allowable Subject Matter

1. Claims 1-10 and 12-14 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1-10 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 3 wherein the duty cycle correction circuit includes programmable load circuitry (50); and a differential gain amplifier (60) coupled to the first differential output (46, 48) and disposed downstream of the load circuitry (50) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 12-14 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 3 wherein the modifying step includes changing the DC bias level of one of the signal components until the average value of one component substantially equals the average value of the other component (see specification page 6, line 20 through page 7, line 1) in combination with the rest of the limitations of the base claims and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
